1. The disclosure is objected to because of the following informalities: .

In the specification, page 1; the status of Co-pending Application(s) Serial No. 09/833,684 is required to be kept current.

Appropriate correction is required.

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-53 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-46 of U.S. Patent No. 6,691,141. Although the conflicting claims are not identical, they are not patentably distinct from each other because the scopes of the inventions are almost identical.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

3. The following is an examiner's statement of reasons for allowance: the recorded references do NOT teach or suggest the

Art Unit: 2124

"method of generating a parameter for a random-number generator, comprising:

- (1) generating a value;
- (2) using the value to select a prime number;
- (3) generating the parameter based on the selected prime number and a **second prime number**; and
- (4) outputting the parameter for use with the random-number generator"

feature as recited in independent claim 1. Similarly language is used in other independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
